

Welcome to Anatomic Sitt AB

Since 1988 we have had a vision to create innovative equipment and solutions for all those in need, relying on our specialist knowledge and expertise.

At Anatomic Sitt we are proud, passionate people eager to find solutions for the disabled. Many people have helped in different ways to develop our products over the years, and we are delighted that together we have improved the quality of many people's lives.

We consider it essential to have well-trained personnel with specialist skills in various fields. We know that sound knowledge often makes for a successful solution without compromise for our clients.

I speak for everybody in our company when I say that we will consider every available option for our clients in our quest to meet their needs.

Finally we wish to thank everyone that has placed their trust in us over the years for their continued and ongoing support, and we promise to always seek new and innovative solutions for you now and in the future. If we have not had the opportunity to work with you, we look forward to being able to do so in the future, as together we can achieve far more.

With kind regards

Bo Eriksson
MD Anatomic SITT AB

Today we have a presence in 18 countries with subsidiaries in Germany, Norway and Denmark
